STONY PLAIN SPORTS DAY,

MONDAY, JULY FIRST.

All Kinds Sports. Dance in Evg.

D. M. Duggan Coming.

Mr. R. C. Johnson, Conservative Candidate for this Constituency in the forthcoming election for the Provincial House, attended at the Stony Plain sports on the holiday. In an interview, Mr. Johnson intimated that the campaigning for his candidature will shortly begin in earnest, and a strenuous effort made to secure his election. Mr. D. M. Duggan, leader of the Conservative party in this Province, will deliver an address in Stony, at a meeting the date for which is being arranged.

Duffield Picnic, July 13.

Altho the date of the Duffield Picnic is a little later this year than it is usually held, this fact will not interfere with its attractiveness, or its popularity with the regular patrons. Andy Brass and his committee have arranged a very complete program for the day's doings, which includes races for young and old, and also several boxing bouts between well-known wielders of the padded mite; as well as competitions in wrestling—grunt-and-groan style. The celebration will be held on the new grounds, in the town. One novel feature is the committee's offer of \$3 for every load a truck driver brings to the grounds. A dance in the evening.

Plitt—Radio.

A wedding took place in the Leduc Baptist Church on Friday, June 28th, when Miss Radio, of Leduc, became the bride of Mr. Wm. Plitt. The ceremony was performed by the pastor, Rev Mr. Dalm. Several of the young couple's friends from this district, including Mr and Mrs F Goebel of Brightbank and Mrs F Horne, were present at the ceremony.

Another Popular Picnic.

Given fine weather at that time! Onaway will draw a big representative crowd from Stony Plain for their picnic day on Thursday next, July 11. Several of the local teams are billed to be present and contest for some of the good prizes offered. Among these these teams will be the baseballers, the basketballers, and possibly a softball aggregation. Onaway's sporting events have always been an attraction to the local sportsmen, and July 11 will probably be no exception.

Public School Closes.

The local Public school closed on Friday last for the eight-weeks Summer vacation, which ends on Tuesday, September 3d. The pupils in Mr Moyer's room, to the number of twoscore, held its usual picnic at the Fair Grounds, where games were played and refreshments served.

HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salada Black Tea in a pint of fresh boiling water. After six minutes strain liquid into two of a Pyrexia. While hot, add 1 1/2 cups of granulated sugar and the juice of 2 lemons. Stir well until sugar is dissolved; fill container with cold water. Do not allow tea to cool before adding the cold water; otherwise liquid will become cloudy. Serve with chilled ice.

"SALADA" ICED TEA

Protect Wild Life

This is an age of organization. Men and women, boys and girls, band themselves together in clubs, associations, unions, large or small, some single isolated groups, others as branches of a Provincial, Dominion, or International body. There are clubs to promote almost every conceivable thing, or object, in which mankind can possibly be interested. Their number is legion, and new organizations spring into existence almost every week.

Many organizations have been in existence for a long time, have large memberships, and very definite objects to serve. They have long occupied a useful and honorable place in our democracy, command the respect of all, and have made worthwhile contributions to society as a whole. Members of such bodies are banded together, as a rule, in support of some great principle to which they are intensely devoted.

There are other organizations which come into being under the stress of temporarily prevailing conditions, and when those conditions change and pass away, these organizations pass out of existence, some having exerted a beneficial influence in the direction of reform and progress; others leaving little but a trail of disillusionment and loss behind them.

It would be impossible to even list, let alone classify, the organizations now in existence making appeal for the support of the public, and it is not the intention of this article to make any such attempt. Rather at this time it is proposed to attract attention to one particular organization, to which no great publicity has been given in past years, but which has been engaged in quietly, but none the less effectively, promoting a cause in which the people of Canada ought to take a very keen and active interest. On former occasions the attention of readers of this column has been drawn to other worthwhile organizations, consequently in now singling out one specific organization for a word of commendation we are making no new departure.

The organization now referred to—possibly we should refer to it in the plural and say organizations—are the Fish and Game clubs or leagues of the various provinces. These organizations are province-wide, not confined to sportsmen alone, but wide open to the naturalist and all lovers of wild life, whether they hunt with a gun or a camera or the notebook of the scientist, for, in the final analysis, the interests of these are common to all.

The objects of these organizations are to promote wild life research; by an educational campaign to instill into the minds of people the cardinal rules and laws of nature and the necessity of giving to nature the assistance of the human element, which is necessary, in order that the happiness which comes from plenty can continue to exist; to secure the passage of the necessary laws to prevent extinction of declining species and to ensure the rigid observance of those laws; to endeavor to maintain the necessary surface water supply, natural cover, trees and food conducive to a bountiful supply of useful wild life, and to control or eliminate those of its enemies which threaten its continued existence.

From this abbreviated outline of objects it will be seen that, in promoting them, these organizations are likewise promoting the welfare of all irrespective of whether they are directly interested in the preservation of wild bird and animal life or not. For example, agriculturists and livestock men, in recent years, have seen the wisdom and necessity of conserving surface water supplies brought close home to them. Equally so, is the wisdom and necessity of protecting trees from wholesale destruction in order that one of the main sources of surface water supplies should not likewise be destroyed.

As a people we have devoted far too little thought and study to the many forces and factors nicely balanced by nature to make this world a habitable, productive and beautiful land, and we have proceeded in our ignorance to do many things which have worked to our own injury with dire results and at a tremendous cost and enormous loss to ourselves and our country. We must work with nature with knowledge and understanding, not in direct opposition to nature, if we are to survive and prosper.

Apart, therefore from the attractiveness which an abundance and great variety of wild animal, bird and fish life gives to any country, the natural conditions which make such wild life possible are likewise the conditions which give beauty to a country and provide what may be regarded as the basic foundation upon which the productivity of the land rests, for without water and natural shelter the land would become a desert.

For these reasons, among others, Canadians should support organizations like the Fish and Game Clubs, if not by enrolment as active members therein, at least by extending their sympathy, support, and co-operation in achieving the objects for which such organizations exist. In a word, every Canadian should be a protector of Canada's wild life, and alert and ready to assist in maintaining those natural conditions which alone make wild life possible.

Glider Picked Up Wireles

Wireless messages were received in a glider over Dunstable in mail week for the first time in England. Mr. G. E. Collins, who holds the British distance gliding record, made the experiment, and he said afterwards that it was highly satisfactory.

Used For Centuries

The Mohammedan lunar year of 354 days is a creation which corresponds to nothing in nature, says an Egyptologist, yet this illogical calendar system has been used for 1,213 years—or, as a Mohammedan would count it, 1,254 years.

A WORLD OF FLAVOR

Airport Now Obsolete

Thousands Of Dollars Being Spent On Alterations At Croydon

Improvements and extensions costing thousands of dollars are being made to Croydon Aerodrome to cope with the growth in air traffic.

When Croydon was equipped as a main airport at a cost of \$1,500,000 in 1928, it was considered adequate for all London's air services for many years to come.

Since then passenger and goods traffic has increased by over 300 per cent, and air lines radiate to all parts of Europe, the Empire and South America.

In seven years the airport has become too small for its job, although nearly all the home airlines have been transferred to Heston and Essex airports.

The lay-out of the buildings is to be altered and extended to speed up the examination of baggage and passengers. Passengers who have flown from Paris in one and a half hours are sometimes held up for 20 minutes for this inspection.

When the alterations are completed in two months passengers will be inspected while baggage is unloaded from the airliner.

Methods of simplifying the loading and unloading of baggage to and from motor coaches will be used.

An Interesting Exhibit

Development Of Transportation Shown In Many Working Models

From a chariot of ancient Rome, the development, up to the present day, of transportation on land, on sea and in the air, was depicted in a transportation exposition at Saint John, N.B.

Hundreds of working models showed the growth of all means of transportation from the crude vehicle of long-ago to the vastly improved and more beautiful machines of to-day.

A feature of the indoor exhibit was a miniature display of Saint John river and part of the harbor with tiny ships anchored within, and a group of 74 pictures of sailing vessels famous in the early days of Saint John.

At Union station the latest steam locomotives were on exhibition in their "Sunday best," while at Saint John airport a fleet of Canada's speediest and most up-to-date aeroplanes was shown.

South Pole Tourist Trade

May Be Winter Sports Playground For Australians In Future

The South Pole, or rather the great ice barrier 700 miles this side of it, is envisioned as the winter sports playground of Australians of the future.

The pole is about 3,100 miles from Melbourne and the barrier 2,400 miles. The imaginative with an eye on the development of safe long-distance air travel, see the tourist of the coming day indulging in snow sports under the shadow of the active volcanoes of Erebus and Terror hunting seal, catching penguins, going kayaking among the bergs and making short morning sled trips "into the blue."

Sir Douglas Mawson, Australian polar explorer, especially has been sketching prospects for development of the Antarctic, including possibilities of initiating a seal fur trade, canning of penguin eggs and the opening of a winter sports ground.

Aerial Photography

New Camera To Take Panoramic Views From The Air

An invention which may revolutionize aerial photography has been perfected by an optical firm in Germany, it was announced.

The new camera, designed to take panoramic views from the air, is equipped with eight lenses whose combined range embraces the entire terrain at all points of the compass. At an altitude of 15,000 feet it is possible to photograph an area of 220 square miles, the manufacturers claimed.

Cummings museum, London, contains an elaborate display of witcher remedies collected from Londoners in the last few years. 2106

BIG size BIG value BIG satisfaction

BIG BEN

Wants Damages

Moose Smashes Automobile And Owner Wants Ontario Government To Pay

Last fall a bull moose ran into his automobile and went off with the radiator shell and a headlight rim, and now Arney Gravelle, of Nainburg, wants the Ontario government to pay for it. He has made formal claim to the department of game and fisheries.

Gravelle said he and a companion were driving a car filled with blankets into a new lumber camp in the Glendale Crown game reserve, north of South St. Marie, Ont.

A turn in the road brought them face to face with the bull moose. As the car went forward the moose attacked. The first smash sent the license plate into the bush. The second swipe took off the radiator shell and half a fender. Gravelle and his companion were frantic as they tried to hold their seats in the car.

Will Is Read Yearly

Has Claimed Public Attention Since Probation In 1873

There are doubtless older testaments in the vaults of the Registrar's Office, London, but none which so periodically claims public attention as that of Henry Cloker, probated in 1873, which must be read at Wren Church of St. Magnus the Martyr, Lower Thames Street, whenever a descendant of one of the original beneficiaries wishes to dispose of the property inherited. In the very nature of things the petitions for reading have become more numerous as time has passed, so that one reading a year takes place, and at every reading, according to the terms of the will, the executors, the Worshipful Company of Coopers, and the Master and Wardens must put in an attendance.

Work Is Recognized

Two Westerners Honored At Meeting Of Canadian Seed Growers' Association

As recognition of their outstanding work as seed producers, R. D. Kirkham, Saltcoats, Sask., and W. D. Lang, Cawston, B.C., were made honorary life members of the Canadian Seed Growers' Association, in convention at Edmonton. Further honor was conferred when the two growers were made "Robertson associates" of the organization, a distinction commemorative of Jas. W. Robertson, former Dominion agricultural commissioner.

Mr. Lang has been active in the association for 10 years and Mr. Kirkham for 20 years, during which time the latter has done important work in the purification of Marquis wheat. Bronze medals will be presented later.

May Take Pets On Train

New Ruling For Passengers Using Sleeping Car Drawing Rooms Or Compartments

Animal lovers may take their pets with them, but not leave them at home or crate them when travelling on trains, it was learned.

The Canadian National Railway, the Canadian Pacific and the Pullman Company announced patrons of sleeping car drawing rooms or compartments might take with them, dogs, cats or small animals, or birds, as long as they were not vicious or objectionable. But they must be in suitable containers.

The privilege does not apply to passengers occupying space in the body of the car, and the pets will not be allowed outside of their masters' rooms.

The song sparrow has about 2,500 feathers.

Firestone TIRES
At these prices are BARGAINS

Firestone Tires do not cost one cent more than ordinary tires—you get all the Firestone extra values and mileage at no extra cost.

Canada Has Built Up An Enviably Reputation In Wheat Development Work

(G. G. Carl Fraser)

The wheat breeding activities of the Dominion Department of Agriculture have been under way since 1886, when the Experimental Farms Branch was inaugurated. In the early days, Dr. Wm. Saunders, first director of the Dominion Experimental Farms, conducted the work under his own personal supervision, and such varieties as Perfection, Huron, Percy and Stanley were made available to the public through his efforts. Increased activities in other lines made it necessary for Dr. Saunders to have assistance and his son, the present Sir Charles Saunders, took over the wheat breeding work in 1903 and became the first Dominion Cerealist.

On account of the high quality of its "Manitoba" wheats, Canada has built up an enviable reputation but, more often than not, early frosts proved disastrous and the demand was made to the Federal Department of Agriculture for early maturing varieties. Red Fife, the popular wheat at that time, was too late in maturing and earlier sorts had to be developed.

Dr. William Saunders had been a great believer in the possibilities of crossing wheats of suitable types in order to produce strains likely to possess the specially desired characters. From some of his crosses, made under his guidance, his son, Sir Charles, was able to develop the world-famous Marquis wheat, which is perhaps the greatest single contribution to Canadian agriculture resulting from agricultural research.

This variety possessed an earliness which, at the time, was a great asset. In 1907, was quite remarkable. It was a week to ten days earlier than Red Fife and had quality and yield in addition.

The advent of Marquis and the remarkable expansion of agriculture to new lands made during the decade 1910 to 1920 created demands for yet earlier wheats, and Ruby was introduced during the critical period of 1916 to 1918. This variety had the advantage of being three to five days earlier than Marquis, but in threshing it had the fault of shelling too easily and never became really popular. In 1929, a variety called Garnet was distributed to over a thousand farmers and was followed in two years' time by another new Cereal Division wheat called Reward, which has since become famous as being one of the best wheats yet developed from the standpoint of quality, weight per bushel and appearance for show purposes. This variety has never been beaten for premier honors at the big shows since its introduction. Both Garnet and Reward are from five to eight days earlier than Marquis.

Work is being carried on at the present time in the West to make a final choice of the best of several new rust resistant varieties of wheat which the Dominion Department of Agriculture has developed at its Winnipeg laboratory and at the Branch Experimental Farm at Brandon, in an effort to overcome the terrible losses suffered in years when wheat stem rust is prevalent. Considerable success has crowned the efforts of the scientists working on this problem and it is confidently expected that a new rust resistant wheat of suitable quality and yielding ability will be available shortly. Further work is being done by the Dominion Experimental Farms Branch to produce wheats early as Garnet or Reward but which are more desirable than either. Some very promising material is under test at the present time which is expected to make further contributions to the number of good wheats already produced by the Dominion Department of Agriculture.

Students of sixteenth century English discover that there were 83 words, from amount to yerk, used in those days to describe the business of thumping or attacking an opponent.

Must Be Best Quality

Wheat Seed Growers Warned Against Using Inferior Grade

If Canada is to maintain her status as a wheat producing country she must pay more attention to quality, Prof. Robert Sumnerby, Quebec, told the annual convention of the Canadian Seed Growers' Association in his presidential address at Edmonton.

"Owing to the acute situation in which we find ourselves in relation to markets at no time in the history of our country was it more important than now that we should pay attention to the yield per acre and more particularly the quality of our crops," Prof. Sumnerby declared.

Object of the association, he said, was the raising of the level of yield, quality and value of farm crops in Canada through the distribution and use of high quality seed.

A large proportion of farmers are still using seed of inferior grade and the educational work of the association must be continued and extended to drive home to these farmers the importance of good seed.

It has been difficult for seed growers of recent years to sell seed, at profitable prices. Government departments and grain companies by means of a well directed seed exchange program have facilitated the distribution of the best varieties of quality seed, Prof. Sumnerby stated.

Record Honey Crop Expected

B.C. Looking For Higher Production Than Last Year

British Columbia's 1934 crop of 1,512,075 pounds of superb quality honey set up an all-time production record for the province, says A. W. Finlay, Huntington, provincial bee inspector.

Practically the whole crop has been disposed of, and the average price was 10 1/2 cents per pound. British Columbia apiarists received approximately \$160,000, he states.

With a comparatively small carry-over, the industry is in a fine healthy condition this year. Favorable meteorological conditions are right and there is plenty of nectar-bearing flora, an even better crop than 1933's will be harvested.

Considerable damage was done to hives by flood and storms last winter, especially in British Columbia, where in one instance 50 hives were buried under 10 feet of water for several weeks.

However, B.C. apiarists are not one whit discouraged. Most of them have started over again on a larger scale than ever before.

Had Plenty Of Nerve

Woman Collected Fare From Railway Employees To Travel By Bus

With bus competition the biggest headache railroads are experiencing, it remained for a woman at Arkansas City, Kansas, to force the Santa Fe offices to lend financial assistance to a bus line.

She came into the railroad offices and pleaded she had to go to Bag-nell, Mo., but had no fare. Employees of the railroad collected \$4 and handed it to her.

She was profuse in her thanks. "I'm so grateful," she said, "because I must go see my grandmother." And, as she walked out of the office, she added:

"Now I'll have to hurry to find out when I can catch a bus to Bag-nell."

Very Few Left

It is noted that the death of Viscount Byng leaves but one outstanding military leader of the Great War surviving in England, says the Toronto Mail and Empire. That is Field Marshal Viscount Allenby. In France, Petain and Franchet d'Esperey, in Germany, Ludendorff and Mackensen and in the United States Pershing are the remaining commanders who played great roles in the struggle.

Anxious For Improvement

Town-Dwelling Natives Of South Africa Want Education

Changes in the South African native outlook which he ascribed to the influence of European civilization, were discussed at Cape Town by Dr. A. W. Roberts in a lecture on native problems.

Town-dwelling natives, he found, had completely severed all ties between themselves and rural natives. Their ideas in time would become entirely European. Although they spoke their own language, they preferred to use the English construction and no longer cast their own language in its original mould. Natives had also lost the idea of war, although there were still small faction fights.

Their ideas on marriage had also undergone a change. In the reserves there was room for a man to have many wives; but in locations there was no room ever for a second wife. Contact with Europeans had enlarged the native's mental vision. What natives most eagerly sought after to-day was knowledge and education for their children.

Even outwardly natives had changed through their contact with European civilization, said Dr. Roberts. In the 54 years that he had been an observer of native life he had seen a slight modification of countenance. Their faces were becoming thinner; the heavy looks, chin, hair and lips were becoming more European looking. But the native would not change in the essentials of life. As he was to-day so he would be a thousand years hence. He would have the same love of laughter, song and friends.

Funny-Looking Race Horse

England's funniest-looking race horse is named Crook, after a famous French clown. He has a completely white face on a chestnut body, colorless wall eyes and no eyebrows. He has four white "stockings" on his legs, which make him look as if he were wearing spats. He wins a race occasionally at that.

Study Of Sun Spots Reveals To Scientists Many Interesting Facts

An important astronomical study and one which may in time provide a basis for valuable predictions concerning the weather and living and economic conditions is that of sunspots. These spots appear from time to time on the face of the sun, fluctuate in numbers and size in an irregular period with an average length of 11 years, commonly called the "eleven-year sunspot cycle". Sunspots are usually accompanied by large areas of bright clouds, high in the solar atmosphere, and consequently relatively strong emitters of ultra-violet light. When sunspots are most numerous ultra-violet light reaching the earth may be double the amount received when they are scarce. Ultra-violet light ionizes the upper atmosphere of the earth and when spots are numerous there are more aurora, greater disturbances in terrestrial magnetism, telegraphy, and radio than when they are scarce. Ionization promotes haziness and cloudiness in varying degrees during the progress of the sunspot cycle and serious changes in weather and effects on living things result.

Investigations at the Dominion Observatory, Department of the Interior, Ottawa, of the Canadian records of temperature, precipitation, thunderstorms, agricultural damage, grasshoppers, grouse, rabbits and furbearers, and measurements made at the observatory of the annual growth-rings in trees from various places in Canada, reveal the influence of the sunspot cycle in varying extent and phase, dependent on the region. The influence is of course only an average one, and is complicated in individual years by the many other factors involved. In the long run, however, its effects are clearly indicated.

Temperatures throughout Canada are higher at sunspot minima than at maxima. The range varies from about 1 degree Fahrenheit to 4 degrees Fahrenheit with a mean value of about 2 degrees Fahrenheit. In the Prairie Provinces the range is high, Calgary for example showing 4 degrees Fahrenheit higher temperature at minimum than at maximum in the mean.

Thunderstorms are more numerous at sunspot minimum than at maximum in general throughout Canada. The Toronto records show about 30 per cent more thunderstorms at sunspot minimum than at maximum. Forest fires due to lightning consequently fluctuate in numbers, in the sunspot cycle.

Precipitation at inland points is greater at sunspot minimum than at maximum, the Prairie Provinces having in the mean about 50 per cent more precipitation at minimum than at maximum of spots. At oceanic points, such as St. John's, Newfoundland, the opposite is the case, greater precipitation occurring at sunspot maximum. Other points blend these terms and square reactions of opposite phase in varying degrees.

Forms of life are affected in harmony with the particular meteorological cycle in each region. At inland points the annual growth-rings of trees, the number of grasshoppers, grouse, and rabbits are considerably greater at or near sunspot minimum than at maximum. A range of from 17 to 27 bushes to the acre in the average of Canadian wheat, oats, barley, and rye is shown in the mean of 1821-1920 sunspot cycle for the years 1903 to 1929, the greatest mean yield occurring near sunspot minimum, though the record is far too short for precise evaluation of the sunspot influence. Potatoes for the same interval show a 25 per cent greater yield at sunspot minimum than at maximum. All such records should of course be considered for each region separately.

The last sunspot minimum occurred near the end of 1933 and the next maximum will probably be in the middle of 1935. Further knowledge of the sunspot cycle will, it is believed by scientists, eventually assist in permitting long range weather forecasts of a general nature, thus providing valuable information relating to forest protection, wild life conservation, and other matters of social and economic importance.

Calivating Monkeys

Escaped Animals Cause Quite A Commotion Amongst Officials

Suggestions were pouring into a Montreal amusement park yesterday that Cartierville as to the best means of catching 10 monkeys who have been missing lately.

Twelve of the little fellows escaped from their island prison when an employee at Belmont Park left a plank across their moat after he had fed them.

Two were recaptured but the others are believed to have taken to the trees in the well-wooded nine miles of country stretching between Cartierville and Montreal.

An official suggested a way of catching the playful animals. He advised the purchase of two, perhaps three, bottles of Scotch whiskey. The spirits, diluted with water, would be distributed about the Cartierville neighborhood in cups.

The monkeys, convivial creatures, would descend from the trees and put down the whiskey like seasoned "topers," it appears. As they have no heads, their capture then would be easy.

The obvious catch, of course, was the monkeys might not be first to the cups. For authorities were taking that into consideration in deciding whether or not to adopt the plan.

Dr. Fred Allison and Edgar J. Murphy have discovered that gold, platinum, and five other chemical elements, in chemical combinations, chemically the same, but different in weight.

The SNAPSHOT GUILD NEW ANGLES

Some people have the notion that the only pictures worth taking are those of unusual things. They take a camera along when they travel but seldom use it at home, unless something special is happening. But, believe it or not, some of your greatest picture possibilities are around and near your home. But, you may say, "I have already made good snaps of the house, the family, the pets, the garden, and the view out. What else is there to show?" It's a safe wager that there are dozens of other picture possibilities, and all of them as interesting as the ones now in your album.

The secret of finding them is simply a matter of keeping your eyes open. Get the habit of looking at things—everything—as though you had never seen it before. It's quite amazing the way this habit will sharpen your interest—now dulled by sheer familiarity—in even the most commonplace things.

Not all of us are interested in photography as an art—and if you don't believe it, it is so, just one of the salons or study some of the pictures in the advertising appearing in the better magazines. Is there any reason why we should not strive for artistic snapshots? Back of every fine, picturesque picture is some one who has kept his eyes open for the unusual.

Don't be afraid of doing things in unusual ways. It's really a spring tonic to take pictures of old things and scenes from a different viewpoint. "Candid" photography and taking pictures at unusual angles were discussed in a recent Snapshot Guild, but perhaps some of you may have noticed that in that article was not to have people in stiff, unnatural poses when taking snapshots. Snap them when they are doing something, or at least apparently doing something, instead of having them stand as stiff and straight as a totem pole. Study your various subjects for unusual angles from which you may snap your pictures for unusual effects.

At the present time, take it for granted that present-day cameras, films, and modern photo-fool and photo-flash lamps give you unlimited scope for unusual, fascinating snapshots. To-day almost any picture is possible—and at any time.

You are progressing in your use of a camera when you reach that stage when you find you say, "What a snap at that picture! I've seen that spot every day for the last ten years and never dreamed it had the makings of a picture like that." Such praise will surely thrill you. Maybe you have heard those words already! If you have—congratulations!

JOHN VAN GILDER

WORLD HAPPENINGS BRIEFLY TOLD

Britain has invited Russia to naval talks. It is suggested Russian naval experts shall come to London after visits by French and Italian delegates.

Total gross agricultural revenue of British Columbia in 1934 is estimated at \$38,826,141, compared with \$36,647,007 in 1933, in statistics released by the provincial government.

An aerial traffic survey, to determine whether traffic cops could help unsmile New York's crowded Sunday motor traffic, was made by First Deputy Police Commissioner Harold Fowler.

The Cahon bill amending the Franchise Act passed through the House of Commons. It would prevent judges from upsetting decisions of franchise registrars without positive evidence.

Canada's military forces are represented in the supplementary estimates tabled in the House of Commons by estimates for all three arms of the service. For the militia the appropriation is \$1,651,000; for the naval service, \$145,000; and for aviation, \$1,302,000.

Little Journeys In Science

HUMIDITY

(By Gordon H. Guest, M.A.)

Humidity not only has an important bearing on the comfort of man but it has also a bearing on the daily affairs. The story of humidity begins with the fact that water vapour is a normal component of the earth's atmosphere. Water vapour is simply water in the gaseous state. It is invisible and we cannot become aware of it directly by our senses. Unlike all the other components of the atmosphere, nitrogen, oxygen, argon and the rest, the amount of water vapour present in the air varies greatly from time to time and from place to place. It is sometimes present in the air to the extent of 6 per cent. by volume, and occasionally the amount is too small to be measured.

The air is furnished with water vapour by the evaporation of water in liquid or solid form contained in oceans, lakes, rivers, snowfields and plants. The amount of water vapour which the air can hold depends upon the temperature. Warm air can hold more water vapour than cold air. Strictly speaking, the temperature limits the amount of vapour that can occur in a given space regardless of the presence or absence of other gases, and in scientific usage we say that the air is saturated with water vapour when it contains the maximum possible amount of the vapour.

If the air is fully charged with water vapour, or in other words saturated, any drop in temperature causes some of the gas to change to a liquid or solid. This is due to the fact that cold air cannot hold as much water vapour as warm air. In science we say that some of the water vapour has condensed, and the condensed water forms fog or clouds in the air. Eventually the process may lead to the production of rain or snow.

With the aid of an instrument known as the hygrometer, scientists measure the relative humidity and this value is expressed in percentage. Thus if at a certain time the air is charged with water vapour to half its capacity, the relative humidity is said to be 50 per cent. When the air is saturated with water vapour, the relative humidity is 100 per cent.

Relative humidity plays a very important role in human affairs because it is one of the chief factors in the process of evaporation. When the relative humidity is low, evaporation takes place rapidly from all moist surfaces exposed to the air. When the relative humidity increases, evaporation slows down, and when it reaches 100 per cent., evaporation stops. The seasoning of lumber, drying of fruit, vegetables, fish and the family wash, as well as many other familiar operations, require a comparatively low relative humidity of the air for their rapid performance.

Humidity has a marked effect upon human comfort. The saying that "it's not the heat, but the humidity" contains a great deal of truth, though it is not the whole truth. Our sensations of heat and cold depend upon the rate at which heat leaves our bodies, and this is regulated, so far as atmospheric factors go, by the cooling power of the air, which depends upon three things: temperature, wind and humidity. The thermometer may climb into the nineties, yet if the humidity is low we remain comfortable, especially if a breeze is blowing. Such temperatures combined with high humidity are unbearable.

World's Greatest Racing Classic

Unfortunately the average spectator at the annual Indianapolis Speedway Classic is unable to witness much of the tense drama of the race, which takes place in those little concrete-walled boxes known as the "pits," located on the "apron" of the track near the starting point. Here the "teams," composed of a dozen men—a necessary organization for every entrant—perform their duties in an atmosphere tense with excitement but with the precision of a well-drilled stage show. Without their help no driver would stand a chance of winning.

There is the directing genius behind the strategy involved in this four-and-a-half-hour contest. Whirling around the two-and-a-half-mile rough brick oval at speeds approaching 150 miles an hour, their senses reeling from the thunder of their motors, the fumes from the engines, and the eye strain, the drivers lose track of their position and their speed.

It is the pitmen who keep them informed on these important matters, and advise them regarding strategy through a complicated system of signaling. When to come in for water and gas, and who the leaders are at the moment are among the many pieces of information that the driver must depend upon his pit crew for.

The operations in the pits are as thrilling, at times, as the actual race itself. A car slides onto the apron and stops in front of its own pit. Half a dozen men leap the low concrete wall, each concentrating on a definite job. The cap is off the radiator in a second and a stream of cool water is flowing in; gasoline is already being poured into the tank; tires are examined and two men lift the hood and their expert eyes and ears can tell in a split second whether all parts of the engine are synchronizing.

One or two A.A.A. officials dash up. The pit crew gives them the latest news of the race. Their inspection may mean loss of many precious seconds—possibly elimination from the race. These officials have the authority to order adjustments, and, if in their judgment the car has a defect, to order it from the race as a precaution of safety for all concerned.

FASHION FANCIES

DARLING DRESS SO SIMPLY CUT—POCKETS, APPLIED RAIN TRIM, GIVE IT FRENCH CHIC

By Ellen Worth

It is difficult to imagine anything easier for mother to tackle than this darling little dress.

It's so simply cut, depending on two cleverly placed pockets and colorful banded trim for its chic and individuality.

The dress model was of pale blue linen-like cotton. One band was of navy, one of white and one of a red and white print.

Checked seersucker in red, white and blue is very effective with red, white and blue band trim of pique, with the blue pique used for the pockets.

Style No. 753 is designed for sizes 8, 9, 10 and 12 years. Size 8 requires 1½ yards of 38-inch material with ¼ yard of 38-inch printed material, and ¼ yard of 38-inch plain material.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 176 McDermott Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day; the price is 15 cents.

SUNDAY SCHOOL LESSON

JULY 7

MOSES
(Leader and Lawgiver)

Golden text: Blessed is the nation whose God is the Lord. Psalm 33:12a
Lesson: Exodus, Chapter 24.
Devotional Reading: Exodus 34: 27-35.

Explanations And Comments

Moses Leads the People to Ratify the Covenant, Exodus 34:3-8. After Moses had ascended Mount Sinai and there had lodged in his mind "the words and the judgments" recorded in Chapters 21, 22 and 23 of Exodus, he told the people about them and they agreed to obey them. With one voice they answered, "All the words which Jehovah hath spoken will we do." "Remember that every lip [save of two men] which united in that lightly made vows drew its last breath in the wilderness, because of disobedience, and the burst of homage becomes a sad witness to human weakness and changefulness. For a moment the people were emboldened, and obedience was theirs. It was high-water then, but the tide soon turned." (Alexander MacLaren).

Moses first act was to prepare a written copy of the laws which the people had sworn to obey. Then he had a rude altar erected at the base of the mountain to represent the Divine Presence and surrounded it with twelve uneven stones to represent the twelve tribes of Israel. "The use of pillars is an evidence of the antiquity of the cult of sealing the covenant recorded here, as they were afterwards forbidden, owing to their association with heathen worship." See Dt. 16:22.

Then young men offered burnt-offerings and peace-offerings of grain. "Burnt-offerings and peace-offerings differed mainly in the use made of the sacrifice, which was wholly consumed by fire in the former, while it was in part eaten by the offerer in the latter."

The newly-written book was produced and read, and again the people shouted their agreement to obey its laws. Half of the blood from the sacrifice had been poured upon the altar, and now with the other half the people were sprinkled, and thus the covenant was ratified as the solemn words were spoken. "Behold, the blood of the covenant, which Jehovah hath made with you concerning all these words."

To Take Out Squeak

Private Firms Will Make Shoes For

to quiet the tread of the Royal Marines of Britain their shoes are to be made by private firms. Since the formation of the organization in 1962 the members have made their own footwear. Admiralty officers announce that the change of makers is for economy, but shoemakers say the real reason is that shoes made by the marines have always squeaked.

Parchment is different from leather in that it is not tanned.

Household Arts

PATTERN 5365

Time—so valuable to every one of us—is especially conserved for the knitter in this unusually attractive fifty-knit blouse. Big needles—a lacy stitch and the result is a blouse done in no time. And, what none of us object to, it takes little wool to make it. The test yoke is all in one with the sleeves which, of course, simplifies the making of it. Another feature is that the top of the blouse is really a straight line onto which the yoke is attached. The yoke effect is very flattering style.

In pattern 5365 you will find complete instructions for making the blouse shown; an illustration of it and of the stitches needed; material requirements. This blouse comes in size 16 to 18 and 38 to 40 (all given in the one pattern) and also contains a plain knitted skirt in these sizes.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 176 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

TAKE MEASURES TO COMBAT THE DROUGHT PROBLEM

Edmonton.—Extensive and diversified measures for meeting the problem of drought area farming are being taken, it was announced to the convention of the Canadian Society of Technical Agriculturists at the university.

Plans of the Dominion government in that connection were outlined by Dr. E. S. Archibald, director of Dominion experimental farms.

Efforts will be made by the federal authorities, said Dr. Archibald, to co-operate to the full with all the provincial agencies in the field, in order to grapple successfully with the problem of the southern prairie region of western Canada.

Dr. E. S. Hopkins, Dominion agricultural husbandman, told the convention that he is optimistic about dry-land farming, believing that it has a more promising future than general farming eastern Canada.

Some 36,000,000 acres of land in the prairie provinces are affected by dry conditions, Dr. Archibald noted, and to meet the situation thus created a rehabilitation program has been drawn up. The legislation passed this year at Ottawa. The program is to run for five years, and the first year's fee is \$750,000, with an additional \$500,000 voted later for water development work.

Fact-finding from every angle possible of interest to the farming industry will be the first step of the new program, as explained by Dr. Archibald. An advisory committee has been set up representative of all the provinces, and working committees have been appointed on water development, soil drifting, and soil surveys, these being three points of special concern to the drought areas.

Ten new illustration stations have been added to the 28 already in existence in the dry belt and will be operated as district experimental sub-stations.

In those areas that, have been abandoned, new classifications of the soils will be made, with the universities assisting, and ways and means of bringing them back to profitable use will be studied.

Other efforts included under the rehabilitation program and outlined by Dr. Archibald include reclamation blocks; a series of experiments in re-seeding methods; personal assistance to farmer desiring to do tree-planting; encouragement of co-operative activity among farmers in various lines, and investigation into the possibilities of water development.

Sir Robert Borden

At Eighty-One He Gives Formula For Long Life.

Ottawa.—Eighty-one years old, Rt. Hon. Sir Robert Borden celebrated his birthday here recently. Abundant work, and little worry was the formula given by Canada's "grand old man" for a long life.

Sir Robert was born at Grand Pre, Nova Scotia, on June 26, 1854. "No one can deny that confused and very difficult conditions confront the nations to-day, but, even at my advanced age, I am still a confirmed optimist; and I not only trust but believe that all will be well with the world," Sir Robert said in an interview. "This is quite consistent with my belief that certain anomalies in our social order ought to be and will be corrected."

Price Spread Expenses

Ottawa.—Appropriations of \$155,000 for expenses of the price spreads commission and \$35,000 for expenditures of the commission on increased subsidies for the maritime provinces are provided in the supplementary estimates tabled in the House of Commons.

British Air Crash

Swanington, England.—Air Vice-Marshal Charles Stuart Burnett was injured when his airplane, lost in a thick fog over this Leicester town, crashed and was destroyed. The pilot was slightly injured.

Competition From Japan

May Have To Adopt Other Methods To Compete With Cheap Products

Paris.—Possibility of using Japan's own industrial methods to compete with her cheap products was raised at the convention of the International Chamber of Commerce.

Sir Arthur Balfour of Great Britain told the 1,000 delegates from 35 countries although Japanese competition may harass individual business, he was convinced it "has great possibilities for international economic good."

Henry Laureys, dean of the Montreal School of Higher Commercial Studies, is the Canadian delegate.

British and American business leaders said after the session in informal discussion the only means of meeting Japan's competition was to study her methods of "rationalization of industry," whereby national co-operation turned a whole industry into a single company instead of dozens.

Walchand Hirachand, Indian business executive, startled the delegates by stating India would be a powerful industrial nation if England stopped "importing India into agriculture" in order to protect the mother country's industries.

The Farmer's Difficulties

Prince Of Wales Says Industry Never Knows What Day Will Bring Forth

London.—The Prince of Wales told a delegation of 200 representatives of the Agricultural Benevolent Societies "the farmer is probably the most beset with difficulties of any man in England."

Receiving the delegates at St. James' palace, the prince said: "My experience in farming on the Duchy of Cornwall estate and my ranch in Canada has taught me a good deal of the practical difficulties of the farmer's life." (His Royal Highness' ranch is at High River, Alta.)

"The industry never knows what tomorrow will bring forth, for in addition to economic troubles, the farmer has always the uncertain forces of nature to contend with. They can easily exhaust his slender capital and cause complete ruin of a life-time's work."

Empire Naval Defence

Toronto, Ont.—"Sea cadet training is good but without sea power is a waste of time and money," Sam Harris, president of the Navy League of Canada, told the annual meeting of the Dominion council as it was announced the council would discuss a resolution favoring a policy of empire naval defence.

Elected By Acclamation

Winnipeg.—Two Manitoba government members were elected by acclamation in provincial by-elections set for July. In Russell, Hon. I. B. Brithth, new minister of health, was unopposed, and J. R. Pitt became the new member for Arthur, formerly represented by the late Hon. D. L. McLeod.

Grant For Currie Estate

Ottawa.—Recognition by the nation of services of Sir Arthur William Currie, former commander of the Canadian Corps, who died in November, 1933, is noted in the supplementary estimates tabled in the House of Commons. An appropriation of \$50,000 has been made to his estate.

Would Strengthen Navy

Paris.—The scrapping of important existing naval treaties was forecast in a resolution adopted by the naval affairs committee of the chamber of deputies which invited the government to take "all useful measures" to strengthen France's naval power in the Mediterranean and the Atlantic.

Jap Troops For China

Tokyo.—Japanese military leaders decided in Hankin that military operations were necessary to clear up the situation on the Jehol-Chahar border and immediately ordered a Manchukuo detachment to attack "offending" Chinese forces, said a Renko (Japanese) news agency despatch.

GIFT DECLINED

It has been announced that Lady Houston's offer of \$1,000,000 for the defence of London has been declined by the Chancellor of the Exchequer. Above is a picture of Lady Houston who is very much interested in all matters pertaining to England.

Convention For The Deaf

Winnipeg Man Is Elected President By Acclamation

Saskatoon.—Charles W. White of Winnipeg was elected president by acclamation of the Western Canada Association for the Deaf at the fourth evening session of the triennial convention. Mr. Alec Swanson, B.A., and farmer of the Lacombe district in Alberta, was chosen first vice-president, also by acclamation while Ghomer E. Norris of Muenster and H. N. Phillips of Winnipeg were elected second vice-president and secretary respectively.

A noteworthy step on the part of the convention was the unanimous voting of \$50 to Sigurd Sanda of Saskatoon to enable him to carry on his experiments in cures for the deaf and near-deaf. Mr. Sanda, local scientist and inventor, will engage in research on hearing problems during the summer months.

More Help For Veterans

Additional \$500,000 Has Been Allowed For Unemployment Relief

Ottawa.—Implementation of some recommendations of the report of Mr. Justice J. D. Hyndman's commission, which investigated unemployment conditions among ex-service men, is indicated in the supplementary estimates tabled in the House of Commons. Unemployment relief to veterans with small pensions and whom municipalities have continued to regard as responsibility of the Dominion as a whole, has an appropriation of an additional \$500,000.

Appropriation For Militia

Ottawa.—Canada's military forces are represented in the supplementary estimates tabled in the House of Commons by estimates for all three arms of the services. For the militia the appropriation is \$1,651,000; for the naval service, \$145,000; and for aviation, \$1,302,900.

WHEN RAMSAY MACDONALD RESIGNED

Our photograph shows Mr. Ramsay MacDonald leaving Downing Street for Buckingham Palace when he placed his resignation in the King's hands. With him is his son, Malcolm, who has been given a post in the new Baldwin Cabinet.

Exchange Of Views

Anthony Eden Talks With Mussolini About Ethiopia

Rome.—Premier Benito Mussolini of Italy and Anthony Eden, British minister for League of Nations affairs, talked for an hour "with the greatest frankness" about Ethiopia, but British and Italian spokesmen both said afterward they reached no agreement.

An official communiqué issued after the conference emphasized the conversation was only an exchange of views, the Italian spokesmen saying Eden made no proposals for settlement of the African issue and the British commenting that the "British and Italian viewpoints were fully set out."

Industrial Policy

Britain Planning To Provide Work For Unemployed

London.—The government is embarking upon a planned industrial policy as an aid to employment, political circles learned.

Intentions of the cabinet were learned when Sir Horace Wilson, chief industrial adviser to the government, was transferred to Premier Stanley Baldwin's own staff.

The government's recent decision to give railroads £40,000,000 (about \$200,000,000) for improvement of transportation facilities around London, it was understood, was the first step in the general planned policy.

Floods In North

Railway Line In Peace River District Reported Blocked

Edmonton.—Northern Alberta railway line to Peace River district was reported blocked at Widewater as floods in the Lesser Slave Lake region continued. Region north of Edmonton was reported inundated for miles and farmers were moving mail, freight and even hogs by boat to Big Meadows from where wagons were able to reach the railway.

Flood waters halted the Northern Alberta Railways train which left Edmonton for Peace River, near Slave Lake village.

Ban Submarine Warfare

Britain Ready To Discuss Naval Issues With European Powers

London.—Great Britain, with Germany's promise never again to engage in unrestricted submarine warfare in her possession, has made ready to discuss naval issues with France, Italy and Russia.

Prime Minister Stanley Baldwin informed the House of Commons that the three had been invited to send delegations to London, but evaded questions as to whether all invitations had been accepted.

C.P.R. Earnings Up

Montreal.—Traffic earnings of the Canadian Pacific Railway Company for the week ending June 21 were \$2,375,000, an increase of \$230,000 over \$2,143,000 over the corresponding week last year.

OPPOSITION GIVEN TO PROPOSAL OF GRAIN DEALERS

Ottawa.—Strong opposition was registered by the wheat pool to the proposal of the Winnipeg grain dealers that the government continue to stabilize the market but allow sales of futures and ordinary market operations whenever prices were above a fixed minimum. Evidence was given by Paul Brett, president of the Manitoba Wheat Pool, before the house committee studying the grain board bill.

Grain dealers proposed the new board follow the system in Argentina. It would only buy wheat when the price dropped below a minimum, and sell it as soon as possible at a loss if necessary. The board would absorb the loss.

So long as the government stabilized an otherwise open market, Mr. Brett contended, outside interests would take advantage of it to make profits at the cost to the government in the final analysis would be much greater.

"If it is thought advisable and necessary to assist the producers of western Canada for the time being out of the taxes of all the people, it would be much more satisfactory to know this money was going entirely to help the producers and not part of it going to outside interests."

Mr. Brett took the view the only way to assure that all government assistance would find its way to the producer was by the method proposed in the bill, which gives the board a monopoly of marketing the entire crop and would do away with futures selling entirely.

Turning to the first three days in October last year, Mr. Brett said less than 4,500 bushels of wheat were delivered to country elevators. Hedges against this delivery would not have been greater than 5,000,000 as an outside limit on the Winnipeg market.

What happened, witnesses said, was that October futures closed at 81¢ on Sept. 30. They opened at 81¢ on Oct. 1, and dropped to 74¢ in three days. This was despite purchases of 18,000,000 bushels by John I. McFarland to steady the market. Where would the price have gone if he had not stabilized it?" he asked.

Witness said even if all the wheat shipped out of Argentina had been hedged in Winnipeg, the hedges were double what they should have been to meet the requirements of the trade. Argentine should have no right to hedge at Winnipeg.

It would be cheaper for the government to have a board that would handle the entire crop than to leave itself open to such attacks from outside interests in a free market, as occurred last October, Mr. Brett said.

Receive Compensation

Ottawa.—Members of the senate and the House of Commons will be compensated for extra expenses incurred by reason of the long adjournment taken at Easter and extending from April 17 to May 20. An item in the supplementary estimates tabled provides \$20,000 from which members will be paid the equivalent of their travelling and living expenses for the journey to their homes and return to Ottawa.

Gasoline Price War

Montreal.—From backyards and scrap heaps in Montreal ancient types of automobiles are now seen puffing along the streets. The gasoline price war has brought the price within reach of most people and those who could not afford to run their cars before are now bringing them out of storage and filling them up with the cheap fuel.

Chinese Boy Finds Gold

Canton, China.—Reports of an extraordinary find of white quartz rich in raw wire gold and of nuggets, is exciting the authorities here. The find is attributed to a small Chinese boy employed as a herdman by a farmer named Tsai residing on Tsai-up mountain in the Unping district of this province.

WM. ABERHART, B.A.,

THE NEWS OF STONY PLAIN AND DISTRICT.

Mr and Mrs Larson made a motor trip to the City on Sunday.

Wm Comisarow, of Viking, spent the week-end in Stony.

Mr and Mrs Michael left Tuesday on a 2-weeks' motor trip, which includes a sojourn at Banff.

Teacher Rusanan is leaving this week, to spend the holidays at Bruderheim.

Mr Harold Outway, Stony's popular young sportsman, is leaving this week for Calgary, to continue his studies at the Institute of Technology.

Wm Aberhart, B. A., will deliver an address in Stony next Tues. July 9th.

Miss Claire Horne visited at Alberta Beach over the week-end.

Mr Irvin Schmidt, a former resident, was a Stony visitor on Saturday.

Mr Glen Carmichael came down from Moose Portage for Sports Day.

Mr Ralph Witherspoon, of Fairview is spending the holidays at his home here.

Mr and Mrs Albert Lusk, Edmonton, were Sunday visitors at the Clarke home.

Mr Magnus Larson, of Edmonton, was a holiday visitor in Stony.

Messrs R Hall and Frank Thompson, who left here Sunday in their aeroplane, were back here Tuesday.

A Baby Clinic was held on Tuesday from 10 to 4, at the town hall.

Tomorrow, the 5th, is sports day at Wildwood, and several teams from Stony expect to attend.

The Glory Hills band gave a concert Saturday evening at the P.O. corner.

The Kotscherofsky musicians were unable to get up to Muir Lake Hall on Monday night, owing to the greasy road.

"The Wembley Gang," the Hanley Comedy Kids, who appeared here some time ago, are billed for a return visit next week.

Between 8.30 and 10.30 on Tuesday morning some miscreants stole 2 flags, the bunting and other articles from the refreshment booth at the Fair Grounds.

On Friday last a demonstration was given at the Strassburger farm of an Oliver tractor and a 4-bottom plow. There was a goodly attendance of farmers.

The Sports Day dance on Monday night was a big success. Barth's orchestra supplied the music. A good-sized delegation from the City attended. About fifty dollars was cleared. This sum was quite a big up-jump over the return from the 1934 dance.

BUTTER AND EGGS WANTED at The Royal Cafe.

SPORTING NOTES OF LOCAL INTEREST

The S. P. Softball League finished its schedule last week, with 8 games. Canaries defeated Pelicans for the 1st time this season by 12-8. Thursday Benedicts took a double header from Behawks—24-14 and 31-18. This leaves 3 teams tied for 1st place with 5 wins 4 lost, with Pelicans in cellar-position with 3 wins. Playoffs to start next week.

The good weather has brought the golfers and tennis players out, and both clubs are putting their grounds in shape.

W.L.'s victory over Oneway was just a flash in the pan. Playing poor ball, the locals lost out on the 27th to Brightbank 11-10. It's too bad when a Stony team can't even down a group from the sticks. A good Senior team would look very good to us now, and you know how to bring this about.

The latest rumor is the formation of a Benedict-Pelican team for hardball. They could field a fair team, and it would help a great deal, if we are ever to have a Senior ball team.

Stony's Basketball first trekked up to Keep Hills on Friday, and won 2 games to take 1st prize money by defeating Brightbank 12-11, and then winning the other in overtime. It's such a small prize, but the game helped put them in condition for the big day on Monday.

W.L. basketball team bowed to defeat at home the same evening to Central, by a score of 14-12. This was a good game, and the home team led most of the way but did not have the required punch to hold out.

The basketballers took a one-sided and uninteresting game from Central, to make it their 4th League win, and kept them in 2d place, behind Brightbank. One fine feature of the game was a home run by Rusanan when he placed the apple well into the tennis court. This is his first home run since his bad accident some years ago in a senior game against Wataskin. —H. C. O.

Hail in Gainford District.

News from Gainford says that hail struck heavily at crops and gardens about two miles south of that town on Friday, June 27th. It is stated that elsewhere in the district crops look splendid.

C. N. Train Service.

The train No. 190 leaves Jasper for Edmonton Monday, Thurs, Sat. arrives Stony Plain 4.51 a.m.

Train No. 189 leaves Edmonton 9.30 P.M. Tues, Thurs, Sat, and arrive Stony Plain 10.37 P.M.

A Gravelled Road to Jasper.

Paving the way for completion of the all-weather highway from Edmonton to Jasper, the Provincial Government has arranged for a bank credit in addition to a Federal loan for relief purposes. This road project is a definite portion of the 1935 program.

Progress is being made on the construction of the small remaining sections of the highway to Jasper, and graveling of these sections will be done in August, when this road will be completed as an all-weather highway.

ACREAGE FOR RENT.

WORRIED ABOUT YOUR HEALTH?

Let SASKASAL regain and maintain it

Nature gives to Canada in magnificent abundance the natural Mineral Salts found in Little Manitou. These health-giving Salts are recovered and refined by expert Chemists in the form of SASKASAL SALTS.

Thus SASKASAL in turn gives to Canadians in simple form—easy and pleasant to take—the cleansing, purifying, revitalizing product of Nature itself. That is the simple story of SASKASAL Salts, so valuable to you in regaining your lost health and maintaining it in joyous vigour. If you suffer from Constipation, Indigestion, Rheumatism, Kidney or Liver troubles—take SASKASAL Salts. At all Drug Stores—69c. N6

CHAPTER VI.—Continued

As the car moved forward even Jack was dumb. They passed a polling station—a grocery—the post office and drug store—a ramshackle place marked "Restaurant" at which Nancy shuddered—a two-story hotel, its narrow porch hugging the dusty road as if land were too scarce in this vicinity to afford a lawn.

"But there's Cousin Columbine's estate," thought Nancy, grasping at this straw. "It can't be near these awful places. Perhaps there's a side street or—"

No. Mark was steering the car between two sagging gate posts. Nancy stared ahead. Was this the boasted family mansion—this hideous frame house with peeling mustard-colored paint and a pretentious tower at one corner? A wave of rebellion swept through the girl; and something curious seemed to be happening to her ears. She raised her hands to press against them; but heard Cousin Columbine say quickly: "Ears popping? That's only altitude, my dear. We're nearly nine thousand feet above the sea, and on almost the very spot where I was born. Father built this house after he struck silver at Leadville in '78. As you see, it's in need of a coat of paint; but it needed something else a great deal more so, the paint must wait a year or two. Stop at the side door, Mark, or Matthew's likely to slip into us. Aurora and Nancy, where are you? Come here, Aurora, and meet my relatives. Well, Nancy," (she turned, her lined face beaming with happy pride), "what do you think of it? Does the Nelson mansion come up to your expectations?"

CHAPTER VII.

"... And all that saved me," wrote Nancy in her first letter home, "was the arrival of Aurora Tubbs on the side porch."

This was quite true. As the girl cast wildly about in search of an answer that would conceal her state of mind, a woman, so short, and stout, and brightly attired that she made Nancy think of the colored "cubes" she used to play with in kindergarten, fairly burst upon them through a doorway which looked too narrow to admit her. She wore a dress of brightest bluebird blue, and her squariness was accentuated by a starched white apron, tied snugly in

QUIVERING NERVES

When you are just on edge... when you can't stand the children's noise... when everything you do is a burden... when you are irritable and blue... try Lydia E. Pinkham's Vegetable Compound. It will give you just the extra energy you need. Life will seem worth living again.

Don't endure another day without the help this medicine can give. Get a bottle from your druggist today!

Lydia E. Pinkham's
VEGETABLE COMPOUND

the spot intended by nature for a waist-line.

"So you're here," she asked, as if her eyes deceived her.

"The fact is evident, I believe," returned Miss Columbine. "These are my young cousins, Aurora, and I've no doubt they'll be glad to reach their destination. This is Aurora Tubbs, my dears, whom you've heard me mention. Goodness knows what I'd have done without her all these long years."

"Pleased to meet you," said Aurora, and shook hands with Jack, first to alight from the automobile. "And you too, Nancy. Might as well call first names right off, it seems to me, and not be formal. I see you're wearin' a fur coat, but aren't your legs most frozen at the skin stockings?" It was that bag, Miss Columbine, Mark Adam, you set that box of canned stuff on my kitchen table. Come right in, Jack and Nancy, and make yourselves at home. Here's Matthew now. I see you brought two trunks."

Nancy found herself a little breathless, not entirely the effect of cold. She had expected Aurora Tubbs to be a sort of servant, and here she was acting the part of hostess. It was very confusing. Nancy didn't know just what to do. Perhaps Mark Adam sensed her dilemma for as he shouldered his burden the corners of his lips smothered with amusement, and his blue eyes meeting hers, were disconcerting.

"Come in, every one," said Cousin Columbine, stepping down from the Ford with youthful agility. "Turn to the left, and go into my sitting room. I close the parlor during the cold weather. This carpet came from Chicago in 1880—the first carpet in Pine Ridge. I'll have you know, Mark Adam, you and Matthew carry those trunks right up, please. Which is yours, Nancy—that queer stand-up one? Put it in the tower room. Jack, and the other in the northeast chamber. Aurora, bring in the chocolate cake."

"Not my beautiful fresh cake, Miss Columbine!" protested the woman in shocked rebellion. "Not my good chocolate cake I made for supper? If those Adam boys once set their teeth into it we're lucky to have a crumb left over; and—There there! Don't glare at me, Miss Columbine. Shall I bring forks and plates?"

"Fingers were made before forks, Aurora, and it's not a party," replied Miss Columbine, much to Jack's amusement. "Just bring the cake and a knife to cut it. I promised Matthew a piece, and I'll keep my word if we have to bake again tomorrow. You make a splendid chocolate cake, Aurora Tubbs, though as a rule I don't compliment people on their faces."

As the woman, somewhat mollified at this praise, departed on her unlooked-for errand, Columbine chuckled audibly.

"Poor Aurora! I've no doubt she expected to make a great impression by bringing in that layer cake at supper. But those boys are hungry, most likely, and they're still five miles to go. Come in, both of you, and let us have a slice sounded on the stairs. No, Matthew Adam, don't try to escape out the front door. I've a slice of cake for you; though Aurora Tubbs is ready to slay me for suggesting that we cut into her handiwork."

"It's not the cutting I mind, Miss Columbine," Aurora corrected, appearing through one door as the boy came in another, "but seeing it disappear so—so rapidly. You move the family Bible, Matthew Adam, and I'll set it right here on the centre table. It's a handsome cake, I think you'll all agree. Shall I do the cutting, Miss Columbine? I declare, it seems almost a pity."

"What do you think that cake is for, Aurora?" snapped Miss Columbine. "A parlor ornament?" (Nancy smiled though the phrase sounded unpleasantly familiar). "I'll cut the thing myself, or these young fools will go hungry. Give me that knife, and shut your eyes if you can't bear to look upon such desecration."

"You don't need to cut 'em quite so thick," remonstrated the anxious woman, hovering near. "That's a four-layer cake, Miss Columbine, and a wedge two inches at the widest part's enough for any one. Those Adam boys" (she spoke as if the young men were not present) "have

got fierce appetites when they go places, which is no wonder because their mother's not what you'd call a natural cook and owns to it herself, so there's no occasion for hard feelings. If Nancy eats that big wedge now, Miss Columbine, she won't have any appetite for supper."

"Oh, leave us be!" returned the older woman with impatience. "Leave us be! Here's your place, Matthew, and don't drop frosting on the carpet. Stand close to the stove, all of you, and let the crumbs fall into the coal hod. And be sure to tell Aurora Tubbs how good it is. That's why she's hanging 'round the door."

"It's great!" grinned Jack, at which Aurora beamed.

"It's simply marvellous!" said Nancy.

The smile widened; while Mark Adam, an appreciative hand upon his stomach, murmured: "It's superb, Aurora. I warn you now, Miss Columbine, when I get married I aim to steal your cook."

"Wouldn't it be better to marry the cook herself and keep her in the family?" asked Matthew solemnly. This suggestion, coming from a hitherto silent, and obviously bashful young man, was not short of amazing. Nancy glanced at Matthew with new interest; but Aurora smiled.

"And me, married to Victor Tubbs for twenty years? You should be ashamed, Matthew Adam. I don't believe in divorce; and I wouldn't marry your brother if I was a widow woman and he the only male creature in Pine Ridge. He's got a noble nature, Mark Adam has, and I've always said, give me a faithful man or none at all. Help yourself to another slice, Matthew, if you're so hungry you have to lick the frosting off your fingers. And then you'd better be starting along home. These young folks will want to begin unpacking; and if you've got some good, thick cotton stockings, Nancy, I advise you getting into them double quick. And you travel all the way from Massachusetts in that dress? It's like real frost. If you'll give me your trunk key I'd admire to unpack for you."

"No doubt you would," spoke up Cousin Columbine. "But it's high time you were thinking about our supper, Aurora. Better take more cake to munch on the way home, boys; and here's a couple of dollars that I owe you."

"What for?" asked Mark, puzzled eyes on the proffered money.

"For carting those trunks, and us, you donkey," she replied.

"Great thundering prairie dogs!" exploded Mark. "Do you take us for a pair of gyms, Miss Columbine? Come on, Matt, we better get going. The lady wants to pay us for a little matter of lifting trunks!"

"The cake was pay enough, Miss Columbine," Matthew assured her with a shy smile. "We wouldn't think of taking any money. We—we

must run along now or we won't get home in time to milk. Good-night or—good-night, everybody," he added, and hurrying to escape, collided with Aurora at the door.

This caused still further confusion, the young man apologizing, his face scarlet; and Aurora demanding to know why he didn't look where he was going.

"Lose knows I'm not so small he had to miss me in the landscape," she complained as Matthew vanished, his ears pink with embarrassment, a wedge of the precious cake in hand. "If that's a third slice of cake you're cutting for yourself, Mark Adam, you'd better go easy on your supper or I won't be accountable for how you'll feel come midnight. That's a rich cake; richer's common because of company. If you don't hurry Matthew will get home first with all the news."

"You sure do speed the parting guest, Aurora," he commented. "But don't you worry about that news. I'll overtake poor Matt before that cruel bluish has had time to subside. Good-night, Miss Columbine. The cake was bully."

There was surely nothing shy about this young man, thought Nancy, as he extended a friendly hand to all of them (not omitting Aurora), lifted his third slice of cake from the platter, and said: "I'll drop in to-morrow and see if you've got acclimated."

To all appearances he was addressing Jack; but his eyes were on Nancy; and Aurora burst out as the door closed: "I warn you straight off, Nancy Nelson, that you must take anything Mark Adam says to you with a grain of salt. He's as unreliable as an April snow storm; and has broken more Pine Ridge hearts than any one on record up to date. There's an innocent look about you that makes me tremble, and I feel it my duty—"

"Oh, hush up!" commanded Cousin Columbine, while Jack found sudden interest in the landscape. So Nancy looked innocent! That was a good one! He'd have to write that to Aunt Judy. And wasn't it distinctly understood that there were to be no boy friends? It was mighty queer about Cousin Columbine, mused the boy, still at the window. She was no more what you'd expect from her letter than—than Nancy was like Aurora Tubbs! There was certainly something to explain here, and—

He wheeled about at a crisp command from this surprising relative.

"Wake up, Jack. Time enough to get acquainted with Pike's Peak after you're settled. I want to show you your rooms before it gets too dark. Bring those bags along and we'll go right up. I dare say you're used to electric lights; but lamps and candles are all I can provide you with. Don't bring your coat, Nancy. It can hang in the entry though it's cold here and will be till next spring. The stairs are steep; but high ceilings were stylish when Father built the mansion, and he wanted the best. There! This is the tower room, my dear, and I hope you'll like it. There isn't a view here for miles around."

However prejudiced Cousin Nelson might be as to the value of her property, she did not overestimate the beauty of her view. Even in the fast deepening twilight, Pike's Peak stood out gloriously clear against the sky.

(To Be Continued) 2105

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong. Read what he says:—
"I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am working harder than a young man to-day. Thanks, many thanks, to Kruschen Salts. I take them in my tea, and I have recommended them to many. I could not get in or out of bed myself, nor sit up. But now I work now—12 hours sometimes. Kruschen Salts have done it!"—G.J.

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients assist Nature to expel these dissolved crystals through the natural channel. In addition, there are still other salts in Kruschen which prevent food fermentation in the intestinal tract, thus preventing further accumulation not only of uric acid, but of other body poisons which undermine the health.

Little Helps For This Week

The ornament of a meek and quiet spirit which is in the sight of God of great price. 1 Peter 3:4.

Thy sinless mind in us reveal
Thy spirit's plenteous impart;
Till all my spotless life shall fall
The abundance of a loving heart.
—Chas. Wesley

Holiness appears to be as the make soul like a garden of God with all manner of pleasant flowers, that is all pleasant, delightful and undisturbed; enjoying a sweet calm and the gentle life-giving beams of the sun. The soul of a true Christian appears to be a little white flower like we see in the spring of the year, low and humble on the ground, rejoicing as it were in a calm rapture, diffusing around a sweet fragrance, standing peacefully and lovingly in the midst of other flowers round about, all in like manner drinking in the beams of the sun.—Jonathan Edwards.

Of the 328,000 Indians in the United States, 100,000 are without land; many the consequence of Indian affairs, decaying land legislation of some years ago which has proved disastrous for many tribes.

BACKACHE

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take Gin Pills for prompt relief at the first sign of these symptoms. You will feel better, look better—so better, if your kidneys are functioning properly.

GRAIN EXCHANGE MAKES OFFER TO AID PROBE INTO OPERATIONS

Reveals Exchange Suggested Months Ago That Appointment of Pool Man as Government Supervisor Would be Welcomed.

In order to clarify its position in view of statements made at Ottawa, the Winnipeg Grain Exchange has issued the following statement:

"On Friday afternoon the Prime Minister in a speech in the House of Commons reiterated the allegation originally made by Mr. John I. McFarland last October that foreign grain firms were engaged in a bear raid in the Winnipeg market. This allegation was investigated by the Council of the Winnipeg Grain Exchange and was fully answered in a statement issued and published in the press November 2, 1934, in the following terms:

"On October 1st Winnipeg newspapers carried an interview with Mr. John I. McFarland, who is in charge of the government's wheat operations, in which he stated that he would recommend to the government at Ottawa that an investigation be made into the selling of wheat on the Winnipeg market and would urge the government to make representations to the governments of Argentina and the United Kingdom that they take similar action in regard to the futures markets in Buenos Aires and Liverpool. About October 8th a miscellaneous despatch purporting to be the inside story of an organized bear raid on the Winnipeg grain market during the two previous weeks appeared in many of the leading newspapers throughout Canada. This despatch originated apparently from some newspaper service in Winnipeg. It made free use of Mr. McFarland's name and its contents would lead many people to believe that figures and supposed facts given in it must have originated from Mr. McFarland's organization. The article is inaccurate and misleading; there was no condition existing in the trading on the Winnipeg Grain Exchange that would justify such a story. It reads like fiction, and to the best of our knowledge that is just what it is. There is no evidence in the figures showing the market position of grain firms as at September 17th and October 1st, secured by the Council of the Exchange from the Clearing House, and which have been disclosed to Mr. McFarland, that any bear raid was attempted. Mr. McFarland has also been advised by the Council that the international firms whose names have been mentioned in this connection were ready to authorize the Clearing House to make the figures showing their trading available to him.

"The international investigation suggested by Mr. McFarland on October 1st should, in our opinion, not be lost sight of. There can be no argument

about the fact that our greatest need is to export more Canadian wheat, and if there is any hope that an independent international investigation into the situation in the Canadian, Argentine and English markets will disclose anything in the actions of government agencies or individuals that is making it difficult for us to market our wheat abroad, it should be undertaken at once. It would obviously be in the interest of the whole country as well as of our wheat producers. It would, we are sure, be welcomed by the grain trade of Canada.

"The Council of the Exchange is prepared to afford facilities for investigation of the trading operations of all its members, without exception by competent and impartial persons. If such an investigation is deemed to be in the public interest, and has previously advised Mr. McFarland that the Exchange would, in addition, lend all possible assistance to a government supervisor of the kind recommended by the Stamp Commission should the government see fit to appoint one.

The action of the Winnipeg Grain Exchange in offering to furnish reports for December and May wheat of 75c and 80c per bushel respectively was taken at the instance of the Dominion government and in pursuance of the policy the Exchange has consistently pursued of co-operating with the Dominion government, and government wheat agency.

"Following the issuance of this statement, R. W. Milner, the President, with the authority of the Council, advised Mr. McFarland that the Winnipeg Grain Exchange would welcome the appointment by the Dominion Government, to the position of Grain Exchange supervisor, of George McIvor, who has been assistant to Mr. McFarland since December 1930, and who previously to that was General Sales Manager of the Canadian Co-operative Wheat Producers Limited (the Pool Central Selling Agency). The offer of the Council that it was prepared to afford facilities for investigation of the trading operations of all its members, without exception, and as to the appointment of a Grain Exchange supervisor as suggested by the Stamp Commission, has never been withdrawn. Representatives of the Winnipeg Grain Exchange now in Ottawa are prepared and anxious to appear before the special committee of the House of Commons, which has just been appointed, to meet the allegations which have been made with reference to the bear raid and the supposed present short position, and to supply any information which the committee may require."

GARNET WHEAT

After August 1st next, under "Amendments Made to The Canada Grain Act," very small mixtures of Garnet in other kinds of wheat, or of other kinds of wheat in Garnet, will lower the grade. Mixtures of varieties in the field can be detected by examination of the heads. To assist farmers to recognize mixtures in their own crops the Seale Grain Company at each elevator has a Demonstration Plot where the important varieties of wheat, oats and barley will be found growing in a pure state. Farmers are invited and recommended to visit these plots.
